The performance is calculated by Raiffeisen KAG in accordance with the method developed by the OeKB (Österreichische Kontrollbank AG) on the basis of data provided by the custodian bank (in the event that the payment of the redemption price is suspended, using an indicative price). Past performance results do not permit any reliable inferences as to the future performance of an investment fund.

Performance Review 2013

The performance is calculated by Raiffeisen KAG in accordance with the method developed by the OeKB (Österreichische Kontrollbank AG) on the basis of data provided by the custodian bank (in the event that the payment of the redemption price is suspended, using an indicative price). Past performance results do not permit any reliable inferences as to the future performance of an investment fund. Individual costs, namely the subscription fees (up to max 5 % of the invested amount) and redemption fees (up to 0 % of the sold amount), have not been included in the performance calculation. Where these costs are included this will result in a lower performance figure according to the amount of the subscription and redemption fees.

Track Record: 04.05.87

La performance è stata calcolata da Raiffeisen KAG secondo la metodologia implementata da OeKB (Österreichische Kontrollbank AG) sulla base dei dati forniti dalla banca depositaria (qualora i prezzi dei rimborsi fossero sospesi, sarà applicato un prezzo indicativo). I rendimenti passati del fondo comune di investimento non costituiscono garanzia per le performance future. I costi individuali, denominati commissioni di sottoscrizione (fino ad 1% dell'ammontare investito) e commissioni di rimborso (fino a 0% dell'ammontare disinvestito), non sono stati inclusi nel calcolo delle performance. Qualora tali costi fosse compresi, i dati di performance risulterebbero più contenuti in relazione all'ammontare definito per entrambe le commissioni.

I 5 Paesi Top dello Short Term Strategy Plus

Short Term Strategy Plus vs BTP 7-10 anni

Volatilità*

Raiffeisen Short Term Strategy Plus (R) VTA: **2,40%**
Bloomberg/EFFAS Italy Gov 7-10: **11,56%**

La performance è stata calcolata da Raiffeisen KAG secondo la metodologia implementata da OeKB (Österreichische Kontrollbank AG) sulla base dei dati forniti dalla banca depositaria (qualora i prezzi dei rimborsi fossero sospesi, sarà applicato un prezzo indicativo). I rendimenti passati del fondo comune di investimento non costituiscono garanzia per le performance future. I costi individuali, denominati commissioni di sottoscrizione (fino a 5,00 % dell'ammontare investito) e commissioni di rimborso (fino a 0 % dell'ammontare disinvestito), non sono stati inclusi nel calcolo delle performance. Qualora tali costi fosse compresi, i dati di performance risulterebbero più contenuti in relazione all'ammontare definito per entrambe le commissioni.

Approccio STRATEGICO di portafoglio

Scelte obbligazionarie: quale strada seguire?

APPROCCIO STRATEGICO DI PORTAFOGLIO

OBIETTIVI

- Cogliere le migliori opportunità di investimento presenti sul mercato senza farsi condizionare dai movimenti di breve periodo anche attraverso fasi di accumulo
- Beneficiare del valore aggiunto atteso da parte di emittenti e valute dai solidi fondamentali
- Ottimizzare il rendimento atteso allungando l'orizzonte temporale dell'investimento
- Diversificare il rischio di portafoglio in diverse asset classes

- Raiffeisen Obbligazionario Mercati Emergenti (valuta forte)
- Raiffeisen Obbligazionario Euro
- Raiffeisen Obbligazionario Fondamentale Globale

Scelte obbligazionarie: quale strada seguire?

Obiettivo:

APPROCCIO STRATEGICO DI PORTAFOGLIO

Allineare la duration dell'investimento obbligazionario al suo orizzonte temporale in modo da coglierne maggiori benefici nel medio/lungo termine mantenendo l'investimento in Euro e puntando sia su emittenti governativi e sia su corporate

Raiffeisen Obbligazionario Euro

Duration
medio/lunga
(c.ca 5 anni)

Portafoglio
Aggregate

Lunga storia di
successo dal
1997

Cogliere le migliori opportunità di investimento in aree emergenti attraverso un'attenta selezione degli emittenti, senza però esporsi al rischio delle valute locali

Raiffeisen Obbligazionario Mercati Emergenti (valuta forte)

Emittenti
residenti o con
attività
prevallenti in
paesi
emergenti

Portafoglio
ben
diversificato
per emittente e
per paese

Potenziale di
rivalutazione
molto
interessante dopo
fasi di ribassi
non sempre
giustificati

Scelte obbligazionarie: quale strada seguire?

APPROCCIO STRATEGICO DI PORTAFOGLIO

Obiettivo:

Cogliere opportunità di rivalutazione dell'investimento attraverso la scelta di titoli di emittenti governativi selezionati sulla base dei fondamentali delle economie

Raiffeisen Obbligazionario Globale Fondamentale

Diversificazione su titoli di emittenti governativi dagli ottimi fondamentali

Riallocazione annuale degli assets in portafoglio tra i paesi con i migliori fondamentali

Rischio cambio aperto per poter beneficiare dell'apprezzamento delle valute dei paesi più virtuosi

Fondi obbligazionari adatti ad un orizzonte di investimento di medio lungo termine

Fonte: Raiffeisen KAG, Datawarehouse, ² fino al 10.03.14, ³to Maturity

Il Tapering: Bond e Paesi Emergenti...

1. Da maggio 2013 si è iniziato a parlare di *tapering* e i mercati hanno reagito male, cosa attendersi? Numerose possibili considerazioni, ma non dimentichiamo che il programma di acquisto titoli da parte della FED è distaccato dalla politica sui tassi

Le aspettative di tassi in crescita consigliano di evitare l'esposizione a duration medio/lunghe oppure il processo sarà lento e rimangono spazi per investire in titoli che hanno nella duration una fonte di performance?

- a) Raiffeisen Obbligazionario Euro Bond

2. Nel momento in cui la FED annuncia *tapering* si diffondono aspettative di tassi in rialzo e si manifesta sell-off da mercati emergenti:

Maggiori tassi USA >>> Minore appetito per il rischio >>> Deflussi di capitale in uscita da risky assets (come quelli emessi da paesi emergenti) >>> Deprezzamento valute emergenti

I prezzi di titoli e valute emergenti riflettono il loro valore o sono effetto dei flussi di liquidità in uscita destinati a normalizzarsi?

- b) Raiffeisen Obbl Mercati Emergenti (valuta forte)
- c) Raiffeisen Obbl Fondamentale Globale

La fase di volatilitá sui mercati non é terminata, ma..

- ✓ Il processo di tapering é da ritenere solo indirettamente legato ad una fase di rialzo dei tassi che avverrà con modalità e tempi tutti da definire, che fare?

Investire in titoli Governativi e Corporate dell'area Euro di emittenti ad elevato rating cogliendo le opportunità di un investimento con rendimenti ancora sufficientemente appetibili

Raiffeisen Obbligazionario Euro Bond

- ✓ L'andamento molto volatile degli ultimi mesi ha colpito in maniera significativa aree geografiche e valute che presentano solidi fondamentali e prospettive di ripresa, che fare?

*Si sono aperti spazi per investire a prezzi interessanti
Molti analisti vedono già in questa fase spazi per accumulare posizioni ad elevato potenziale di apprezzamento.*

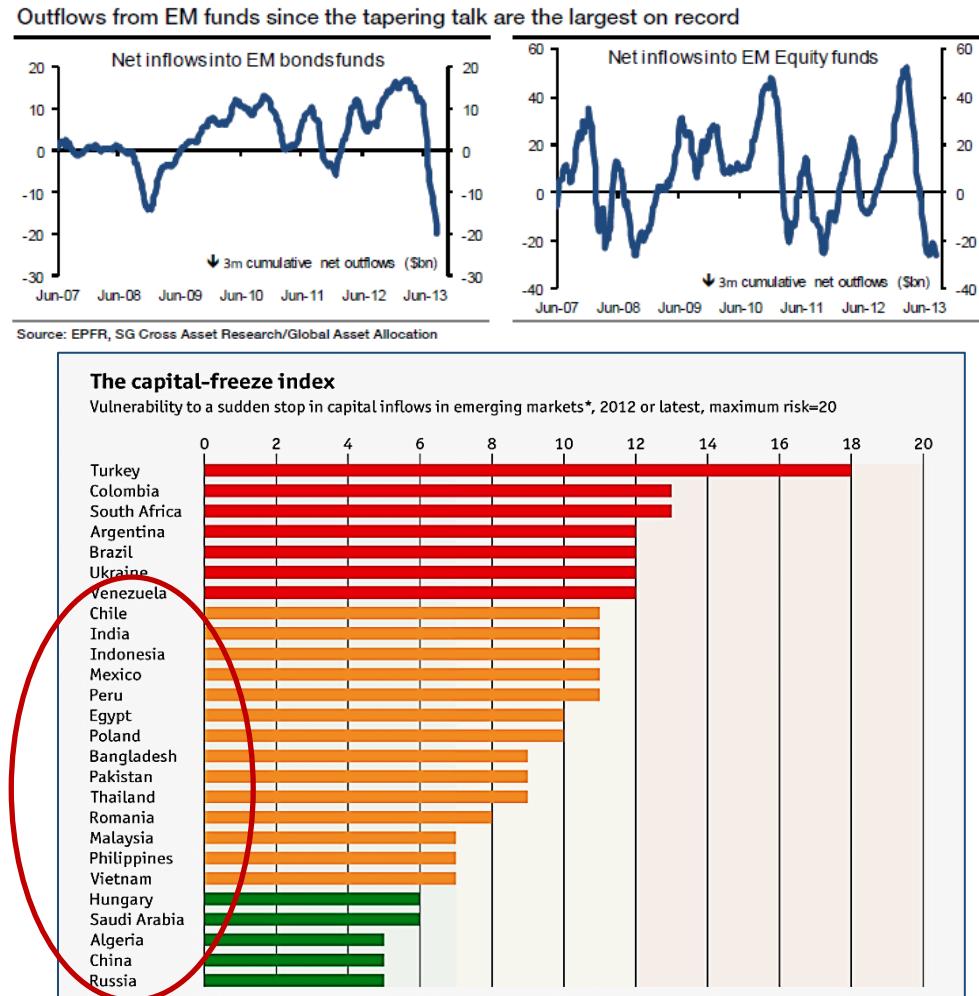

Raiffeisen Obbligazionario Mercati Emergenti (valuta forte)
Raiffeisen Obbligazionario Fondamentale Globale

Flussi di capitale e vulnerabilità dei paesi emergenti:

Da quando Bernanke ha paventato l'inizio del cosiddetto Tapering (maggio 2013), vi sono stati ingenti deflussi di capitali dai paesi emergenti

Tra i paesi emergenti esistono diversi livelli di vulnerabilità degli stessi mercati in fasi di scarso afflusso di capitali esteri

Quali possibilità per gli investitori?

Se si vogliono evitare sorprese nel breve periodo, strumenti di gestione flessibile e/o duration molto corta sembrano rappresentare le migliori alternative.

- Raiffeisen Obbligazionario Euro Breve Termine
- Raiffeisen Short Term Strategy Plus
- Raiffeisen Fund Conservative

Allungare l'orizzonte temporale consente invece di cogliere, a detta di molti analisti, occasioni di acquisto che si sono venute (e si verranno ancora) a creare proprio in fasi nelle quali vengono penalizzate in maniera significativa aree ed emittenti dai buoni fondamentali

- Raiffeisen Obbligazionario Mercati Emergenti (valuta forte)

Performance ad 1 anno

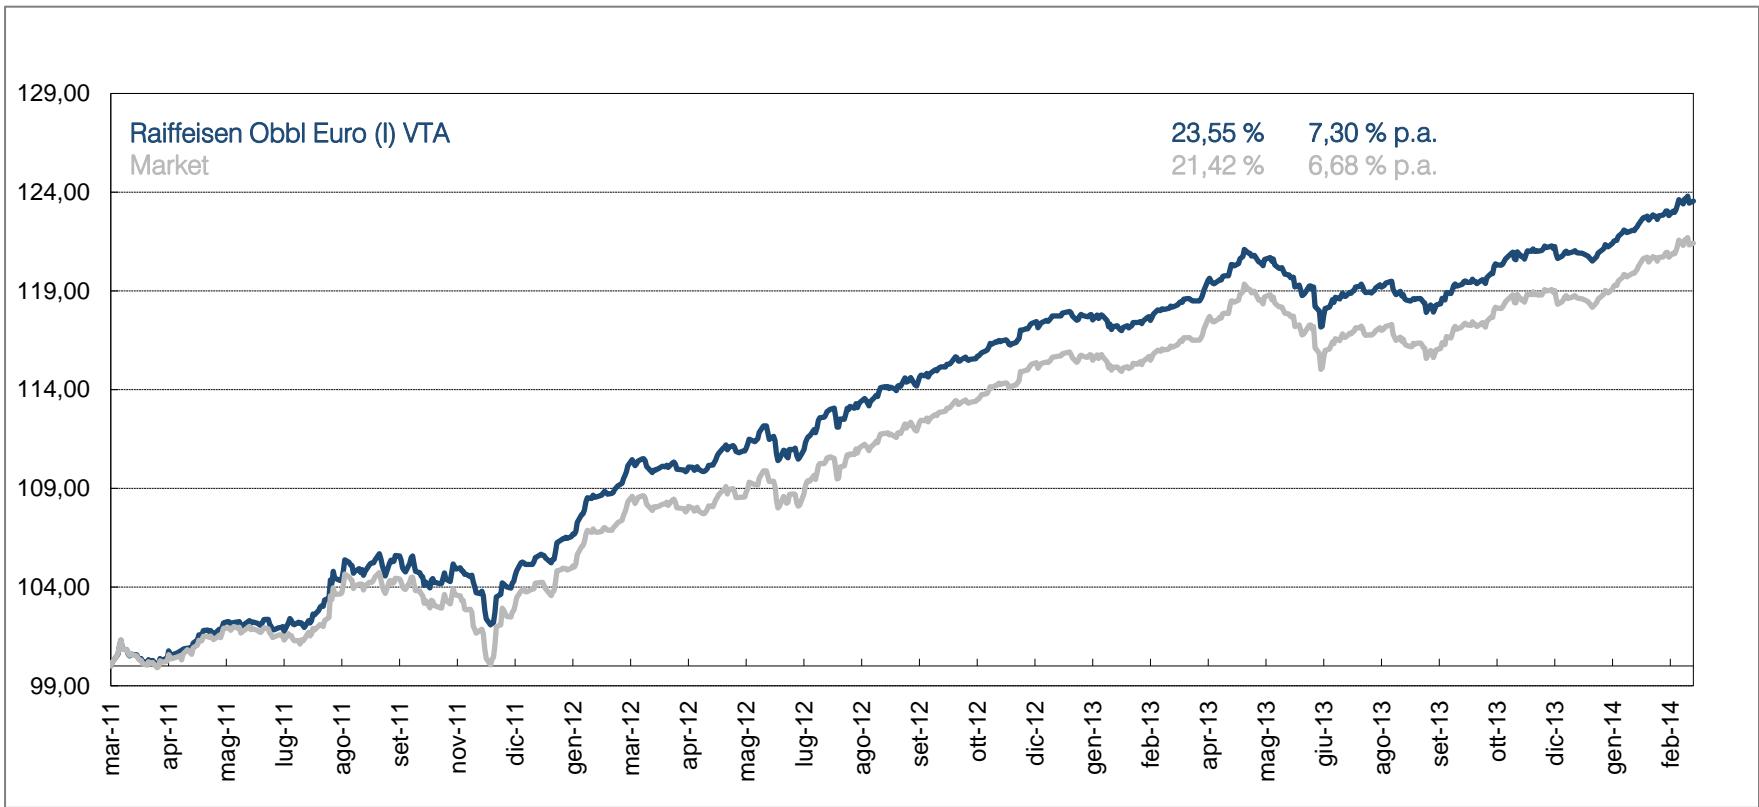

The performance is calculated by Raiffeisen KAG in accordance with the method developed by the OeKB (Österreichische Kontrollbank AG) on the basis of data provided by the custodian bank (in the event that the payment of the redemption price is suspended, using an indicative price). Past performance results do not permit any reliable inferences as to the future performance of an investment fund. Individual costs, namely the subscription fees (up to 2,50 % of the invested amount) and redemption fees (up to 0 % of the sold amount), have not been included in the performance calculation. Where these costs are included this will result in a lower performance figure according to the amount of the subscription and redemption fees.

Per tal motivo è consigliabile un orizzonte di investimento medio – lungo al fine di mediare le fasi di volatilità e consolidare i risultati delle analisi dei fondamentali dei paesi più virtuosi

Importanza e esempi di diversificazione

A titolo puramente esemplificativo abbiamo provato a costruire 3 portafogli con ottica strategica attraverso la combinazione dei fondi Raiffeisen Obbligazionario Euro, Raiffeisen Obbligazionario Paesi Emergenti e Raiffeisen Obbligazionario Fondamentale Globale:

Caratteristiche dei 3 portafogli

I 3 portafogli presentano caratteristiche di diversificazione molto interessanti e alcuni elementi comuni a tutti e 3 i portafogli, ad esempio (aggiornamento 13 Feb 2014):

239 emittenti (tra governativi e corporate);

77 paesi in portafoglio;

16 valute.

In termini di Duration, Running Yield e Coupon (aggiornamento 13 Feb 2014):

	duration	running yield	Ø Coupon
Portafoglio 1	5,78	3,24	3,95
Portafoglio 2	5,77	3,51	4,15
Portafoglio 3	5,60	3,66	4,26

Disclaimer

This document was prepared and designed by Raiffeisen International Fund Advisory GmbH, Vienna, Austria ("Raiffeisen Capital Management" or "RIFA"). Although all information contained therein has been carefully researched, it is for information purposes only, non-binding, based on the current state of knowledge of the persons responsible for its preparation at the time of its completion and subject to change by RIFA at any time without further notice. RIFA is exempted from all liability in connection with this document and the associated oral presentation, in particular with regard to the updated status, correctness and completeness of the included information/sources of information and the actual occurrence of the forecasts contained therein. Furthermore, no forecasts or simulations of an historical performance in this document constitute a reliable indicator of future performance. In addition, investors whose domestic currency differs from the fund's currency should bear in mind that the yield may also rise or fall due to currency fluctuations.

The contents of this document constitute neither an offer nor a buying or selling recommendation nor an investment analysis. In particular, it shall not serve as a replacement for individual investment advisory services or other types of advisory services. If you are interested in a specific product, together with your account manager we shall be pleased to provide you with the prospectus for this product prior to any purchase. Concrete investments should not be made until after a meeting has taken place and subject to discussion and inspection of the prospectus. We should like to point out in particular that securities transactions are sometimes subject to a high degree of risk and that the tax treatment depends on the investor's personal situation and may be subject to future changes.

Raiffeisen Kapitalanlage GmbH – or, for real estate funds, Raiffeisen Immobilien Kapitalanlage GmbH – calculates investment fund performances using the method developed by OeKB (Österreichische Kontrollbank AG), on the basis of data provided by the custodian bank (in case of a suspension of payment of the redemption price, available indicative values are used). Individual costs – such as the subscription fee and any redemption fee in particular – as well as taxes will not be taken into consideration in the performance calculation. Depending on their concrete value, they will reduce a performance accordingly. Please refer to the key investor information (key investor document) or the simplified prospectus (real estate funds) for the maximum subscription fee or any redemption fee. Past performance results do not permit any inferences as to the future performance of a fund or portfolio. Performance is shown as a percentage (excl. charges) while considering reinvestment of dividends. The published prospectus and the key investor information (key investor document) for one of the investment funds outlined in this document may be obtained from www.rcm.at in German language or from www.rcm-international.com in English or in your national language. The published prospectus for the real estate investment funds described in this document is available from www.rcm.at in German language.

The information and data contained in this document, in particular texts, parts of texts and picture material, may not be reproduced without RIFA's prior approval.
