## BEST OF CONVERTIBLES

LE OBBLIGAZIONI CONVERTIBILI COME  
CLASSE DI ATTIVO

## ASIMMETRIA – ELEMENTI FONDAMENTALI

### OBBLIGAZIONI CONVERTIBILI

Le obbligazioni convertibili traggono vantaggio dall'apprezzamento delle azioni ordinarie grazie al diritto permanente dell'investitore di convertire l'obbligazione convertibile in un numero prefissato di azioni. In aggiunta, l'obbligazione convertibile prevede lo status privilegiato di un creditore al quale, a scadenza, viene restituito il suo capitale.

## OBBLIGAZIONI CONVERTIBILI EUROPA – DIMENSIONE DEL MERCATO

- Capitalizzazione di mercato pari a 78 miliardi di euro
- 213 obbligazioni convertibili attualmente in circolazione
- Ragioni per l'emissione di obbligazioni convertibili:
- Emittenti hanno accesso a gruppo di investitori specializzati
- Fondi possono essere raccolti molto velocemente
- Cedola più bassa rispetto a una normale obbligazione societaria
- Emittente ottiene un premio sul prezzo dell'azione attuale
- L'obbligazione convertibile consente all'emittente una certa flessibilità per gestire in modo efficace la sua struttura patrimoniale.

### Legal information:

All data is based on the respective stated reporting date; unless otherwise specified, the reporting date on the cover page shall apply. CONVERTINVEST is classified as an investment firm pursuant to section 3 Austrian Securities Supervision Act (Wertpapieraufsichtsgesetz 2007 – WAG 2007) and is subject to the jurisdiction of and supervision by the Austrian Financial Market Authority (FMA).

This is a marketing communication. This report is exclusively authorised for distribution to institutional investors and under no circumstances it is valid for retail clients. Where institutional performance figures are mentioned, these relate to net fund performance, plus an assumed rebate of 50 BP (calculation method available on request). The individual rebate agreements can deviate from this, which is why the stated institutional performance must be regarded as an example and not as proof of individual performance. Securities services are generally associated with additional costs, which can have a negative impact on performance. The portrayal does not take into consideration the one-off marketing fee of up to 5% depending on the fund, and individual costs, such as fees, commission and other third-party payments which, if taken into consideration, would have a negative impact on performance.
